A land of 2 acres consisting of 2 buildings which make a total of 785sqm (a 640 m² main house and a 110 m² independent house). The construction was finished in 2011 and it features high quality materials in granite, marble, electrical equipment, bathrooms, floors, sound and thermal insulation, aluminum frames, ventilation unit, Corian kitchen countertops and air conditioning. The security doors are equipped with a key kit to separate the owners from the staff while the alarm system features a central security control unit of all rooms from the cell phone. This attention to details along with the choice of high quality materials can be attributed to the owner's constant supervision up to the completion stage since the property was intended to be owner-occupied. On top of that, the completion of the pool equipment installation as well as the lighting, furnishings and electrical appliances of the property were installed 2 years ago when the main house was occupied for the first time. Hence, everything inside the house is nearly new! The 640 m² main house consists of: 3 levels (A-B-C) as well as the semi-basement.
