Farm in Albufeira with excellent location. The property has an old house and several annexes to recover and / or rebuild. It is served by electricity, water and sewage supply connections. Located five minutes by car from the center of Albufeira, with access by tarred road. Currently the activity of planting carob and almond trees is developed, but it has great potential for any type of activity or project due to its immense area and the possibility of urban construction, whether residential or tourist.
