The contemporary structure showcases polychrome windows framed by elegant matte black aluminum fixtures. The floors, made of white travertine with ceramic details, add a touch of sophistication, while the rooms are adorned with wooden planks. Each room also features a built-in wardrobe to maximize space and ensure functionality. The villa spans three floors with a total area of approximately 700 square meters, comprising the following: on the second floor, accessible through the main entrance, there is a spacious panoramic living room with a dining area and an adjacent kitchen with a pantry, storage room, and guest bathroom. The sleeping area consists of two sea-view bedrooms with en-suite bathrooms, a study, a walk-in closet, and two additional bathrooms. The floor is surrounded by a cantilevered terrace ideal for relaxation. The lower floor houses two separate apartments, one with another living room, a dining area, three bedrooms, three bathrooms, and three walk-in closets. On the western side, there is the second apartment, connected but independent, with two bedrooms, a bathroom, an open space with a living room, dining area, and kitchen. At the rear of the property, a spacious garage has been created, connected to the kitchen on the first floor, accommodating 3-4 cars comfortably and serving as a laundry area if needed. Finally, the third floor is dedicated to a living space with expansive 360-degree windows.
