Istria, Fažana, house on two floors with a total of 109m² and a garage of 49m² on a plot of 1031m². The ground floor is essentially a separate residential unit - it consists of four separate rooms and one bathroom. The ground floor of the house is currently not in use and requires complete renovation. The internal stairs of the house lead to the first floor of the house, where there is a spacious living room with a kitchen and dining room, a terrace, two bathrooms and two bedrooms. A complete house requires some to complete adaptation.

The greatest potential and value of this house is in the beautiful garden of 873 m² and the location itself, just a few minutes from all important facilities, and the beautiful beaches are only 1 km away.

Due to its location and content, this kind of plot with an existing house is an excellent investment for the construction of a building with apartments, houses in a row or simply for a luxury villa with a swimming pool.
