The project will enrich the lives of your loved ones with its vital and regional advantages and will offer the most ideal living space in the completed district of Istanbul. You will spend the rest of your life in the spring air. You won't be able to resist admiring the boundless beauty of the forest from your spacious living spaces and wide balcony where you can see the lush landscape from every angle. Our playgrounds, where our children will play safely and build their future on happy memories, will be one of the most colorful places. Their happiness will spread throughout your life. You will experience the spring of happiness with your loved ones.

The project combines low-rise, horizontal architecture with extensive landscaping that uses about 70% of the project's area as green space. It offers you and your loved ones the region's most valuable living space, along with natural beauties. This creates a unique living value in Kayaşehir. You will start a whole new life in a project that offers a peaceful life to your loved ones with its low-rise horizontal architecture and secluded life away from the chaos of the city. The privilege of living in a boutique will give you unique beauty in every moment and make you remember at every opportunity that you have made the right choice for the future.

Based on family life, the project offers a better life for your loved ones with 2+1, 3+1 and 4+1 apartments with large square meters. Your future depends on privileges with playgrounds, fitness center, indoor pool, walking areas and social activities. With the project, every moment of your life will add value to your new life, built on the basis of a comfort-oriented approach and next-generation solutions. You will feel that the quality of your life affects your whole life, starting from your home. The project opens the door to a quality life with its social amenities. In this new life, where sports will be the center of your life, you will lead a healthy lifestyle with your loved ones. You can work out in the gym or gain strength by jogging and walking in the fresh air.
