The Bagcilar district of the resort city of Istanbul is famous for its residential complex, which has all the necessary infrastructure for its residents: educational institutions, shops, a playground for children and dogs. Already a five-minute walk from the residential complex is underground transport. Nearby is a convenient transport hub, which allows you to go to two highways at once: O-7 and O-3. The nearest shopping center is ten minutes walk away. The hospital is only two kilometers away. From the LCD to the main airport of the city can be reached by breaking the path of twenty-seven kilometers. The residential complex of the Bagcilar district consists of only a single residential building, an area with an area of about two thousand square meters. Green areas occupy almost six hundred square meters. The amenities did not end there: the residential complex has a spacious closed parking, a fitness room with a local bath, as well as a room for playing consoles, football and basketball, places for recreation and outdoor games with children. There are only fifty apartments in the residential complex, there are four apartments on each floor.
