This project is of great interest both for those who wish to invest in real estate, and for those who wish to have Turkish citizenship and live comfortably in the center of Istanbul. All socially significant facilities are within walking distance, be it a kindergarten or the metro. The project is located in the prestigious and dynamically developing Levent district, which is the business center of Istanbul. There are large shopping centers, as well as the main offices of banks, educational and cultural and leisure institutions, beauty salons, healthcare facilities, business centers - everything that a person needs for a comfortable stay. The construction of the residential complex was carried out in accordance with the concept of "Life close to nature, in the center of the metropolis." The development of the project was carried out in such a way as to take comfort from modern infrastructure, and benefit from the surrounding forests. The complex covers an area of 103,000 sq. meters and includes 16 blocks. In total, the project provides for 40 retail premises and about 1,000 apartments with layouts from 5 + 1 to 1 + 1. Some apartments have spacious terraces. Attention should be paid to the residents' ability to pick fruits from fruit trees on the territory of the complex.
