The project is designed for comfortable living in Istanbul for those who wish to obtain Turkish citizenship, or by investing in real estate, to obtain a residence permit. Located in the center of Istanbul's elite district of Levent, our project is distinguished by its construction concept "Life in nature, but in the center of a modern metropolis", which provides for the creation of landscaping and landscaping elements in the surrounding residential area. This means that the residents of the complex will have the opportunity to enjoy nature, walk through picturesque parks and enjoy peace and fresh air. Our apartments are located to maximize the benefits of living in the city center, while providing maximum comfort and privacy. Near the house there are all the necessary shops, medical centers, cafes, restaurants, pharmacies, banks. The complex covers an area of 1,350 m on a plot of 29 acres. It consists of 16 blocks with more than 1000 apartments from studios to five-room apartments and 40 commercial premises. In addition, we have provided spacious and bright apartments with a view of the park and the city. Each apartment has a balcony or terrace where you can enjoy a quiet life. Also noteworthy is the possibility of collecting fruits of fruit trees right on the site. We are confident that our project will become a favorite residence in Istanbul.
