This project is suitable not only for investors, those who want to obtain Turkish citizenship, but also for those who just want to live comfortably in the center of Istanbul. All infrastructure is literally at hand. And no matter what you may need, a kindergarten for children or a metro station. There will be no problems with work either, because the project is located on the territory of the prestigious Levent district, which is the commercial center of the city. It is here that the most elite shopping centers are located, including Zorlu and Istinye Park, in addition, for a higher standard of living, there are hospitals, educational institutions, entertainment centers and beauty salons. Here are the head offices of the most famous banks. "Life in nature, but in the center of a modern metropolis" - this is the concept that was used in the development. Thus, residents will be able to enjoy not only a comfortable life in modern homes, but also the nature that will surround them. The area occupied by the project is 103 thousand square meters divided into 16 blocks. As a result, the number of apartments will be over 1000 units and about 40 premises for commercial purposes. There are also terraces in some apartments. A nice bonus will be the opportunity to harvest from fruitful trees located on the project site.
