In one of the districts of Istanbul, namely in Esentepe (next to the Kartal district), beautiful examples of European architecture are recreated, which are reflected in this residential complex. The project is located on the territory of a noisy metropolis, but its interior decoration is in perfect harmony with nature. There are green spaces, recreation areas and paths for pedestrians, artificial ponds and playgrounds for children. The excellent location of this complex deserves special attention. You can get in touch with any district of the capital due to the proximity of the E5 motorway, as well as the metro station. Health and education facilities have been built near the residential complex. In addition, there are many shopping centers and various kinds of entertainment. The area occupied by the residential complex is 40.000 m2 and includes 12 buildings. Here are located 865 apartments, characterized by a high level of comfort. The apartments have a 1+1 layout with balconies. Cafes and shops are located on the first floors. A convenient large parking lot, a gym with exercise equipment and an indoor swimming pool create comfortable conditions for staying in this residential complex. Sauna will help relieve stress, fatigue and will be a great way to relax. The project is conveniently located and has a unique layout, which can attract investment. Along with this, all conditions have been created here for a comfortable life for all family members without exception.
