The architecture of this residential complex, located in Istanbul in the Esentepe district, is made in European style. Not far from this place is Kartal Street, where it is always busy. Although the object is located in the center of the metropolis, the adjacent territory is landscaped (trees, flowers, lawns), which ensures a harmonious stay and peace from excess noise. The landscape also has pedestrian areas, several artificial reservoirs, playgrounds, places for recreation, etc. This complex is worthy of your attention due to its location. Among the main advantages of the object: 1. The E-5 highway is located nearby, providing high-speed access to any area of Istanbul. 2. Within a 5-10 minute walk there is a metro line that allows you to quickly move to a convenient area of the city during rush hour. 3. There are medical facilities near the complex. 4. Within the boundaries of the complex there are educational institutions and shopping and entertainment. 5. A large number of secure parking spaces. 6. Cultural and recreational complex, where each tenant can visit the gym, swimming pool and sauna. The new district covers an area of 40 thousand m2, includes 12 buildings, represented by 865 elite apartments. 1 + 1 accommodation includes comfortable balconies that provide comfort and convenience. The infrastructure of the first floor in the residential complex has shops and cafeterias. Acquiring a living space in this area will be a profitable investment in the future of any family. After all, the entire project was specially designed to save time and comfort for its residents.
