The residential complex is designed in such a way that it consists of 4 blocks, which include 6 premises for commercial use and 217 residential apartments. A total of 223 apartments. Apartments, depending on the layout (3+1, 2+1, 1+1), occupy an area from 61 m2 to 177 m2. In the modern area of Esenyurt there is a developed infrastructure. Due to its geographical position, the area is attractive for various kinds of investments. The Turkish government is interested in the development of Esenyurt, which contributes to the implementation of large-scale government projects. One of which is the subway line, its opening is scheduled for the end of this year. The residential complex is located near the transport interchange, equipped with stopping complexes for public transport, metro, highways and railways. Local residents without any problems get to any corner of the city. Within walking distance are private and municipal medical institutions, universities and schools, and other government agencies. The main highway of Istanbul - E 5 stretches in a five-minute drive from the residential complex. It makes it attractive not only from the point of view of the development of transport infrastructure, but also arouses interest among investors. The residential complex is equipped with its own infrastructure, which includes social facilities that guarantee safe living in comfortable conditions, including recreation and recreation. There are indoor and outdoor pools, gym, parking, sauna, conference room, playgrounds, landscaping and numerous other facilities. The territory of the residential complex is under continuous video surveillance and is guarded by the security service. When developing the complex, the current international standards focused on protection against natural disasters and fires were taken into account.
