A new project in the Asian part of Istanbul, Uskudar district, adjacent to the Gata forest. The facility covers an area of 30,000 sq.m. There are 394 apartments in eight residential blocks of 15 floors each, ranging from 2 + 1 to 5 + 1 duplexes. The area of apartments varies from 134 to 720 sq.m. The huge area of the facility allows you to place a lot of socially significant objects inside. First of all, you should pay attention to the fact that all the internal infrastructure facilities, such as a swimming pool, fitness center, spa and sauna, are located on the territory of a huge park. And the center of the object can be safely called the area where cafes, restaurants, personal services and convenience stores are concentrated. This project in a sense connects the Asian and European parts of the city. From here it is easy to get to the districts of Kadikoy, Atasehir, Nisantasi, Zinchirlikuyu, Taksim, Maslak. Near the object there are metrobus and metro stations. The external infrastructure is in no way inferior to the internal one. There are five hospitals around the residential complex, the nearest one is only two kilometers away. A huge number of schools, colleges, universities, both private and public, gives the choice of where to study for your children. The nearest shopping center "Akasia" from the project is only one kilometer away. The project can be safely considered both for investment and for living.
