A new residential complex in the Topkapi area. The construction was completed in 2020. On an area of 12,000 square meters, in addition to internal infrastructure facilities, there are blocks that include 224 apartments with layouts from 1 + 1 to 4 + 1. The advantage of this project is its location. It is in close proximity to the E5 highway, Davut Pasha Street, as well as Koç University Hospital. The proximity of social and transport infrastructure facilities makes the residential complex very convenient for living. Metro, metrobus, tram - everything is within walking distance. The interior design of the complex is all at the highest level: gardens for walking, recreation areas, a swimming pool, playgrounds, etc. This residential complex gives its residents the opportunity to escape from the bustle of the city.
