We bring to your attention a complex development in Bodrum. This object consists of thirty-nine one-storey villas with 3 + 1 layouts. The choice of the owners are living quarters with views of the sea or the city. The developed internal infrastructure of the complex will give an absolutely comfortable life to future owners. The landscape design of the common areas, as well as the villas themselves, is made of high quality materials. Each villa has its own private parking. The project is located just 3 km from the center of Bodrum, which will allow residents of the residential complex to easily change the calm atmosphere of the complex to the pulsating rhythm of the city. Construction is being carried out as soon as possible, early delivery is scheduled for June 2022, and the full completion of construction in December.
