In Kazlıçeşme, Zeytinburnu district in the European part of Istanbul, there is a luxury residential complex. Under it allotted 110,000 square meters on the shores of the Sea of Marmara. The style in which the complex is made is necessary for the restoration and return to life of historical buildings. "New Urbanism" calls to preserve the culture of the state and the historical heritage of Turkey. This concept was used in the restoration of many buildings in the city. Cultural centers, workshops, kindergartens, schools, cafes and boutiques are similar in style to the beautiful complex. The project is attractive due to the bridge that leads from the building to the sea. It offers a magnificent view that impresses the guests of the complex. They can admire the beauty of the sea and the scenery of Istanbul. Also on the territory of the luxury complex there are places for walking and sports. The residential complex includes penthouses and about 1500 thousand apartments with a gorgeous view of the city and the sea. There are also apartments in the now fashionable loft style. The area of residential premises is diverse: from 55 to 555 square meters. The developer leaves the opportunity to improve the layout of the apartments. The advantage of buying an apartment in this complex is the possibility of sailing and yachting. There are several ports near the complex. Istanbul's main highways are also close to the stunning complex. Not a single developer in Istanbul can surprise with such transport accessibility.
