Luxurious three-room apartments in an elite complex will be a great place for a large family or a short vacation.

The ground floor apartments have a garden, swimming pool and dining area ideal for sunset dining with stunning views of the sea and Patong Bay.

The low-rise complex consists of three three-story buildings, includes a spacious communal swimming pool, parking and beautifully landscaped areas for your relaxation. The apartments are also equipped with a Lutron lighting control system. It replaces traditional wiring and offers owners the most advanced technology. The condominium is equipped with smart technology, and each apartment is equipped with a lighting control system that improves the atmosphere by controlling audio-video systems, entertainment systems, blinds and curtains. The main advantage is the ability to control any light source or group of lights to create "light scenes". Other benefits include lower power consumption and reduced energy costs through more efficient use, longer lamp life and reduced carbon footprint.
