Luxurious two-bedroom penthouse in a luxury complex will be a great place for family living or a short vacation.

The low-rise complex consists of three buildings of three floors, includes a spacious communal swimming pool, parking and beautifully landscaped areas for your enjoyment. The apartments are also equipped with 'Lutron Lighting Controls'. It replaces traditional wiring and offers the most advanced technology for owners. The condominium is equipped with smart technology, and each apartment is equipped with a lighting control system that improves the atmosphere by providing control over audio-video systems, in-room entertainment systems, blinds and curtains. The main advantage is the ability to control any light or group of lights to create 'light scenes'. Other benefits include lower energy consumption and reduced energy costs through more efficient use, longer lamp life and reduced carbon footprint.
